

# Web/Internet Development

The Web Design/Development and Web Technical Support programs include courses in a hands-on environment using the latest technologies. Students will create web pages using editors and programming language. In addition, industry standard software are utilized -- Photoshop, Illustrator, Dreamweaver, and Flash. Creativity and technology combine to prepare students for the wide variety of job opportunities available. Choose from one of the two programs below:

1

## Web Design/Development

The Design/Development focus prepares you for positions where you will:

- Use creative components to develop pages and sites
- Administer and maintain the content of text and graphics within sites
- Apply creative design principles to develop efficient, marketable Web sites

2

## Web Technical Support

The Technical Support focus prepares you for jobs on the server side of the Web such as:

- Structure and system administration
- Programming
- Data connectivity
- Security and privacy design

With each program, you may also transfer into four-year programs in the same field or related fields such as computer information systems.

## Program Options

You can earn any of the following:

- Associate in Applied Arts and Sciences degree (AAAS)
- Associate in Arts degree (AA)
- 1-year Web/Internet Professional Certificates\*
- External Certifications:
  - *CIW Web Foundations Associate* is for individuals with a foundational knowledge in Web site authoring and development
  - *CIW Web Design Specialist* is for individuals specializing in Web site design

\*All courses in the certificate programs can be applied toward an associate degree.

## Personal Characteristics

## Flexible Study

Complete your program through a mix of online and on campus classes.

## Graduation Requirements

Degrees: 4 full-time semesters, 64 credit hours.

Certificates: 2 full-time semesters, 29 to 31 credit hours.

## Courses

Courses include graphics, database design, Operating System, Photoshop, HTML/CSS, design for mobile devices, and more.
